

# Cisco Email Security

Scan results for Tuesday Two

Date: Wed Jan 16 2019 09:28:33 GMT-0500 (Eastern Standard Time)

## **Cisco Threat Analyzer for Office 365**

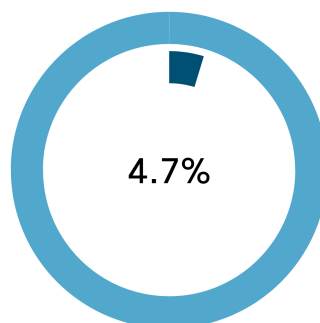

The Cisco Threat Analyzer for Office 365 is a free assessment that quickly detects security gaps in Office 365 email inboxes. It finds security vulnerabilities and identifies whether the threats are malware, malicious URLs, spam or graymail.

This report identifies how many and type of threats found during the scan of selected mailboxes.
